CSTE ANNUAL CONFERENCE

Raleigh, NC

June 2-6, 2019

First in Flight: Recognizing Risk Takers & Risk Factors

2019 CSTE ANNUAL CONFERENCE CONTINUING EDUCATION INFORMATION

The CSTE Annual Conference is a gathering of public health professionals and practitioners focused on epidemiology and informatics. Each year the conference content is determined by the abstracts submitted. The educational purpose of the CSTE Annual Conference is to offer professionals and practitioners the opportunity to enhance their knowledge, improve their skills, and exchange information on best practices and strategies in applied epidemiology.

LEARNING OBJECTIVES

1. Identify at least 3 best practices in applied epidemiology.
2. Describe at least 3 best practices for surveillance and epidemiology.
3. Apply at least 2 public health practice skills presented in workshops.
4. Identify at least 2 strategies and tools to improve public health practice.
5. Articulate the importance of interdisciplinary collaboration for applied epidemiology

TYPES OF CONTINUING EDUCATION (CE)

CSTE has partnered with CDC to provide continuing education to conference attendees. CSTE is offering free continuing education for workshops and plenary sessions. CE is available for doctors, nurses, health educators, veterinarians, Certified in Public Health and general practitioners.

DISCLOSURE: In compliance with continuing education requirements, all presenters must disclose any financial or other associations with the manufacturers of commercial products, suppliers of commercial services, or commercial supporters as well as any use of unlabeled product(s) or product(s) under investigational use.

CDC, our planners, presenters, and their spouses/partners wish to disclose they have no financial interests or other relationships with the manufacturers of commercial products, suppliers of commercial services, or commercial supporters with the exception of: Gregory Gray from the Geisel School of Medicine and he wishes to disclose a contract with InDevR to test their FluChip-8G. Kristen Mertz from the Allegheny County Health Department and she wishes to disclose that she is the Principal Investigator for a study of hepatitis C testing by peer outreach workers funded by Gilead. Trish Perl from the University of Texas Southwestern Medical School and she wishes to disclose consultant work with 7-11 on issues around infectious diseases and safety to customers; Medimmune grant to the Institution (UTSW). Samuel Scarpino from Northeastern University and he wishes to disclose salary from Dharma Platform, stock in Dharma Platform & Iliad Biotechnologies and serving as a consultant for BioFire Diagnostics, Iliad Biotechnologies, and ThinkMD.

Planning committee discussed conflict of interest with Gregory Gray, Kristen Mertz, Trish Perl, and Samuel Scarpino to ensure there is no bias.

Presentations will not include any discussion of the unlabeled use of a product or a product under investigational use with the exception of Dr. Gregory Gray's discussion on inDevR fluchip-8G and IDseq. He will be discussing them in the context of new not yet approved for commercial use diagnostic tools that are being developed to detect novel emerging pathogens.

The Centers for Disease Control and Prevention and the Council of State and Territorial Epidemiologists are jointly providing the CNE for this activity.

CDC did not accept commercial support for this continuing education activity.

For additional questions regarding continuing education, please contact Jessica Arrazola (Jarrazola@cste.org).
