

COVID, Current Events, and More Discussing Syndromic Surveillance Practices in 2020

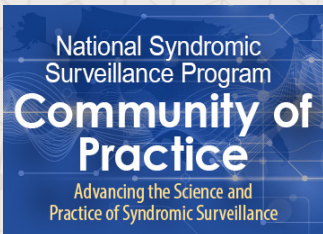

3:15PM EST | November 18th, 2020 | 2020 SyS Symposium

Moderated by Jim Nowicki, MBA – GDIT

Invited Panelists:

Arden Norfleet, MPH – Virginia Department of Health

Live polling will be used: <https://pollev.com/kahuina02>

Council of State and Territorial Epidemiologists

Session Objectives

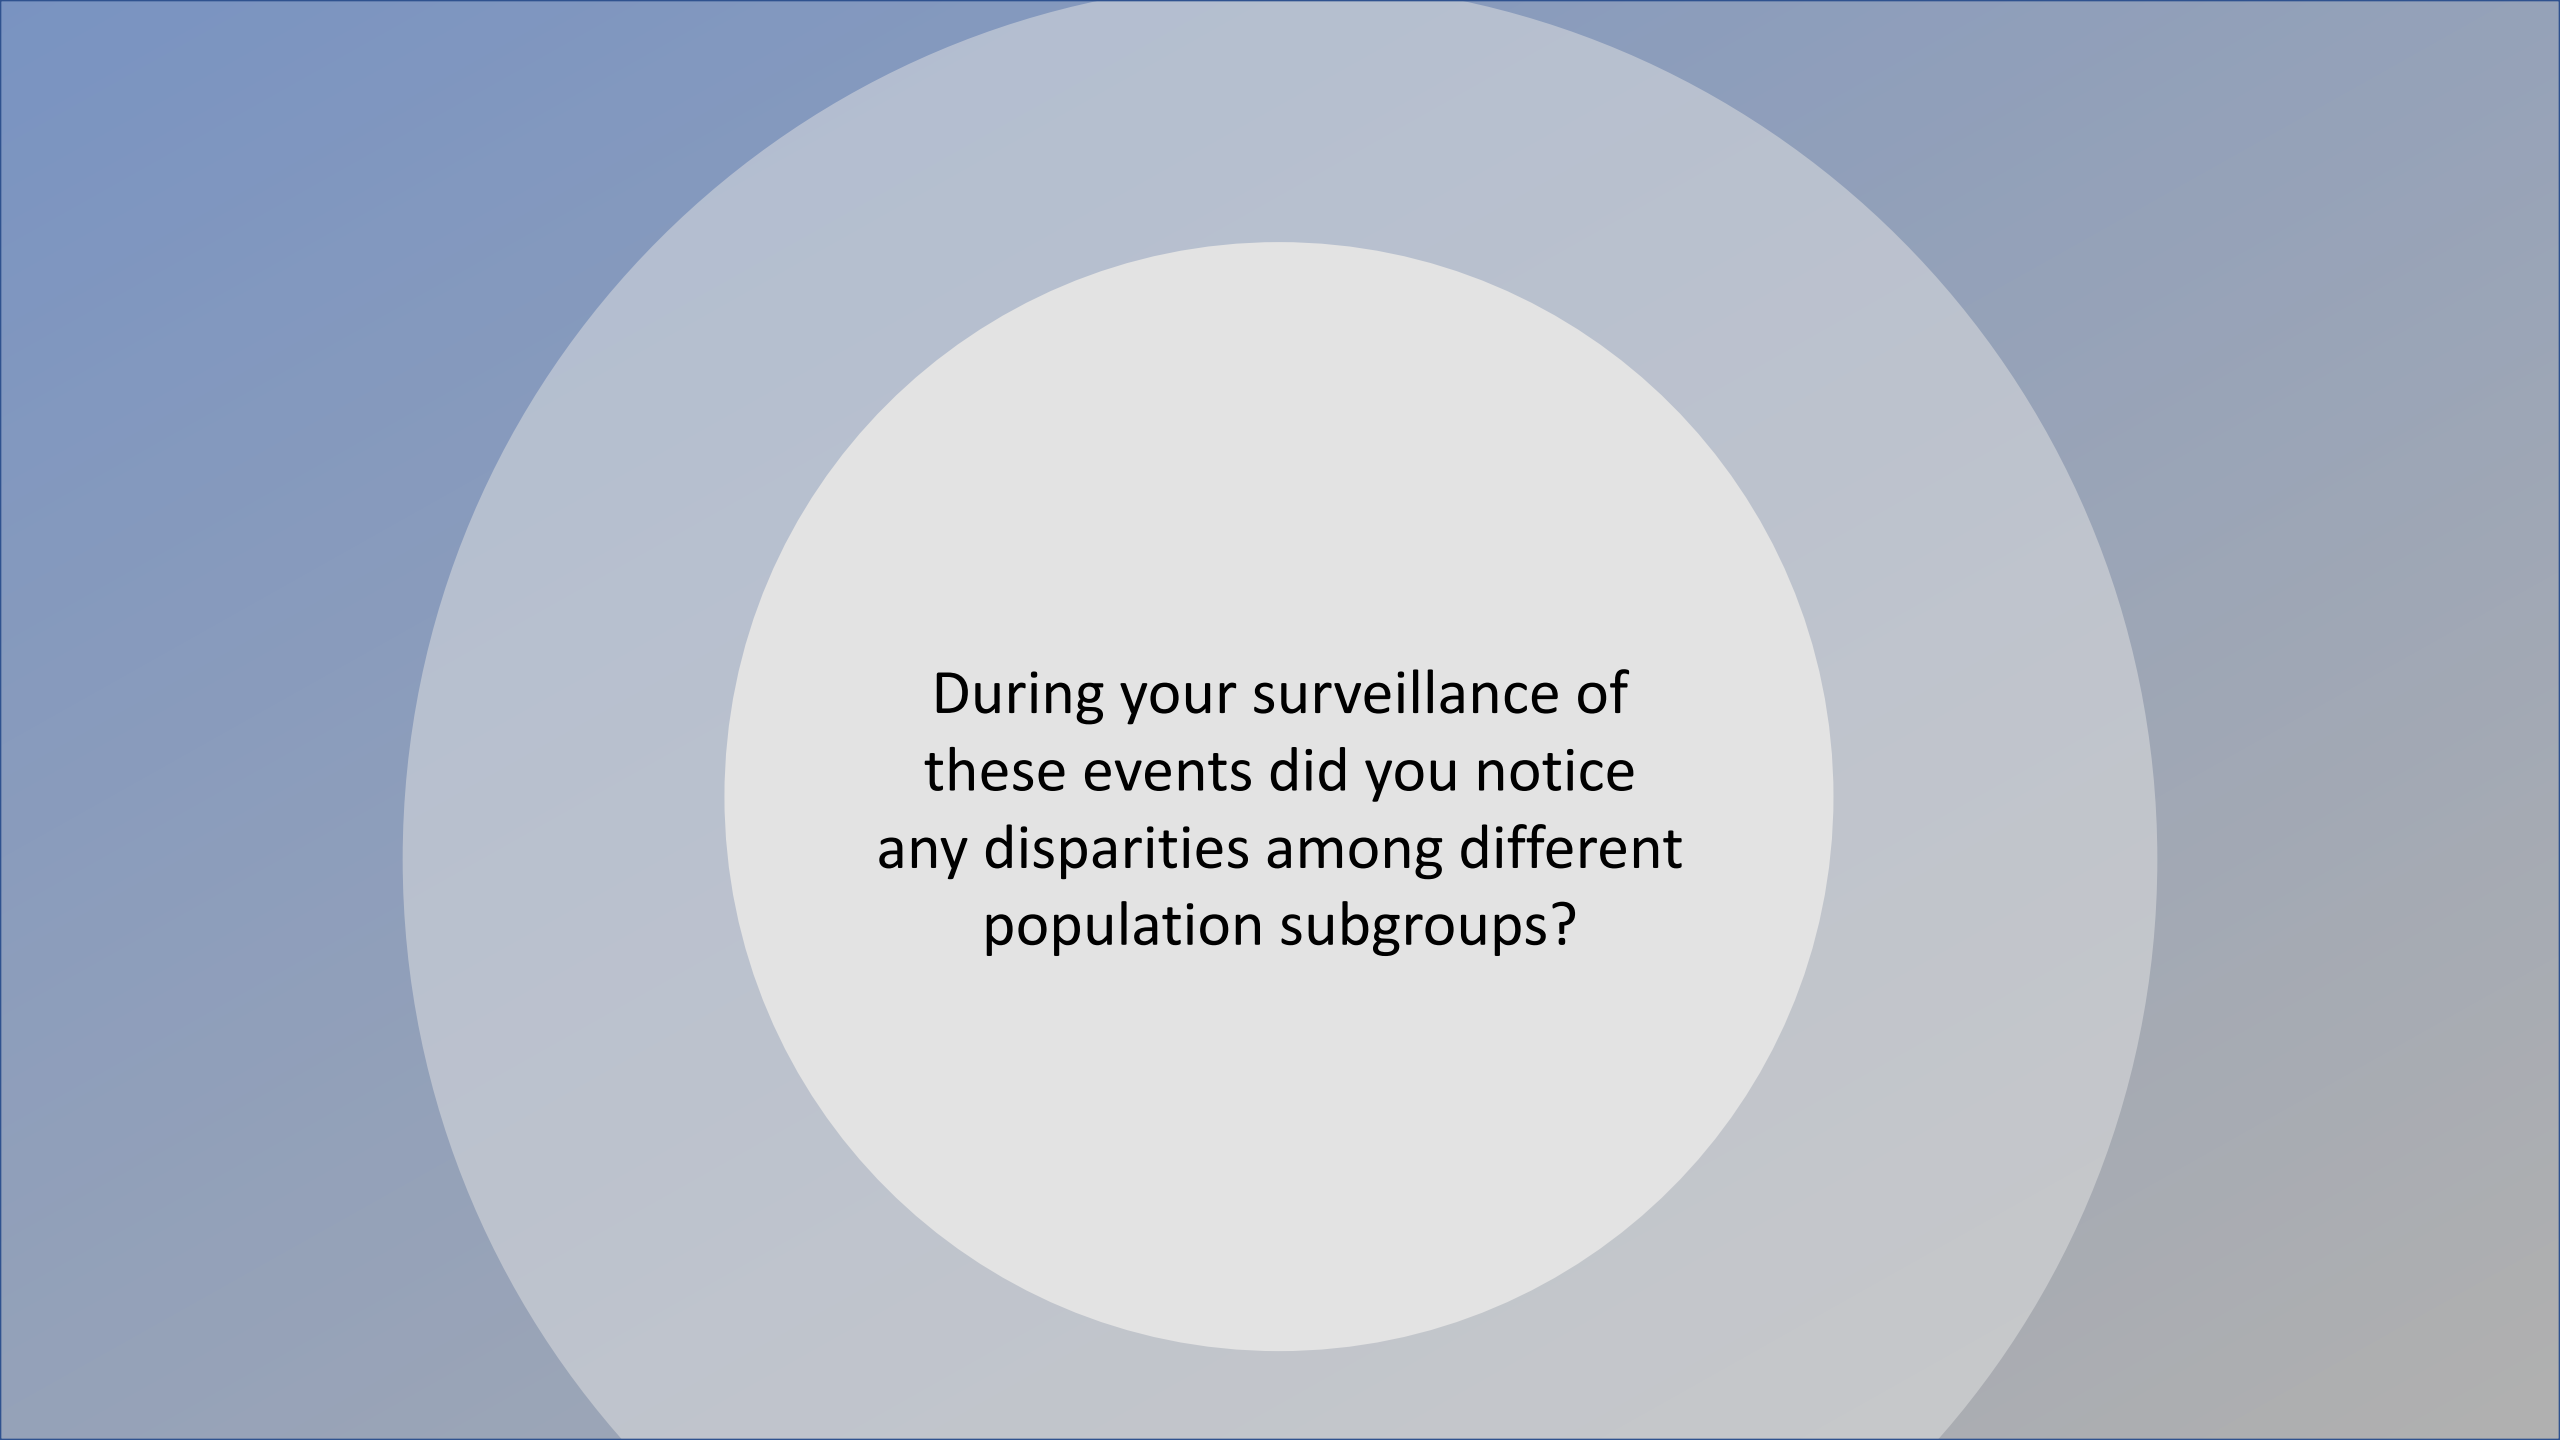

By the end of the session, participants will be able to...

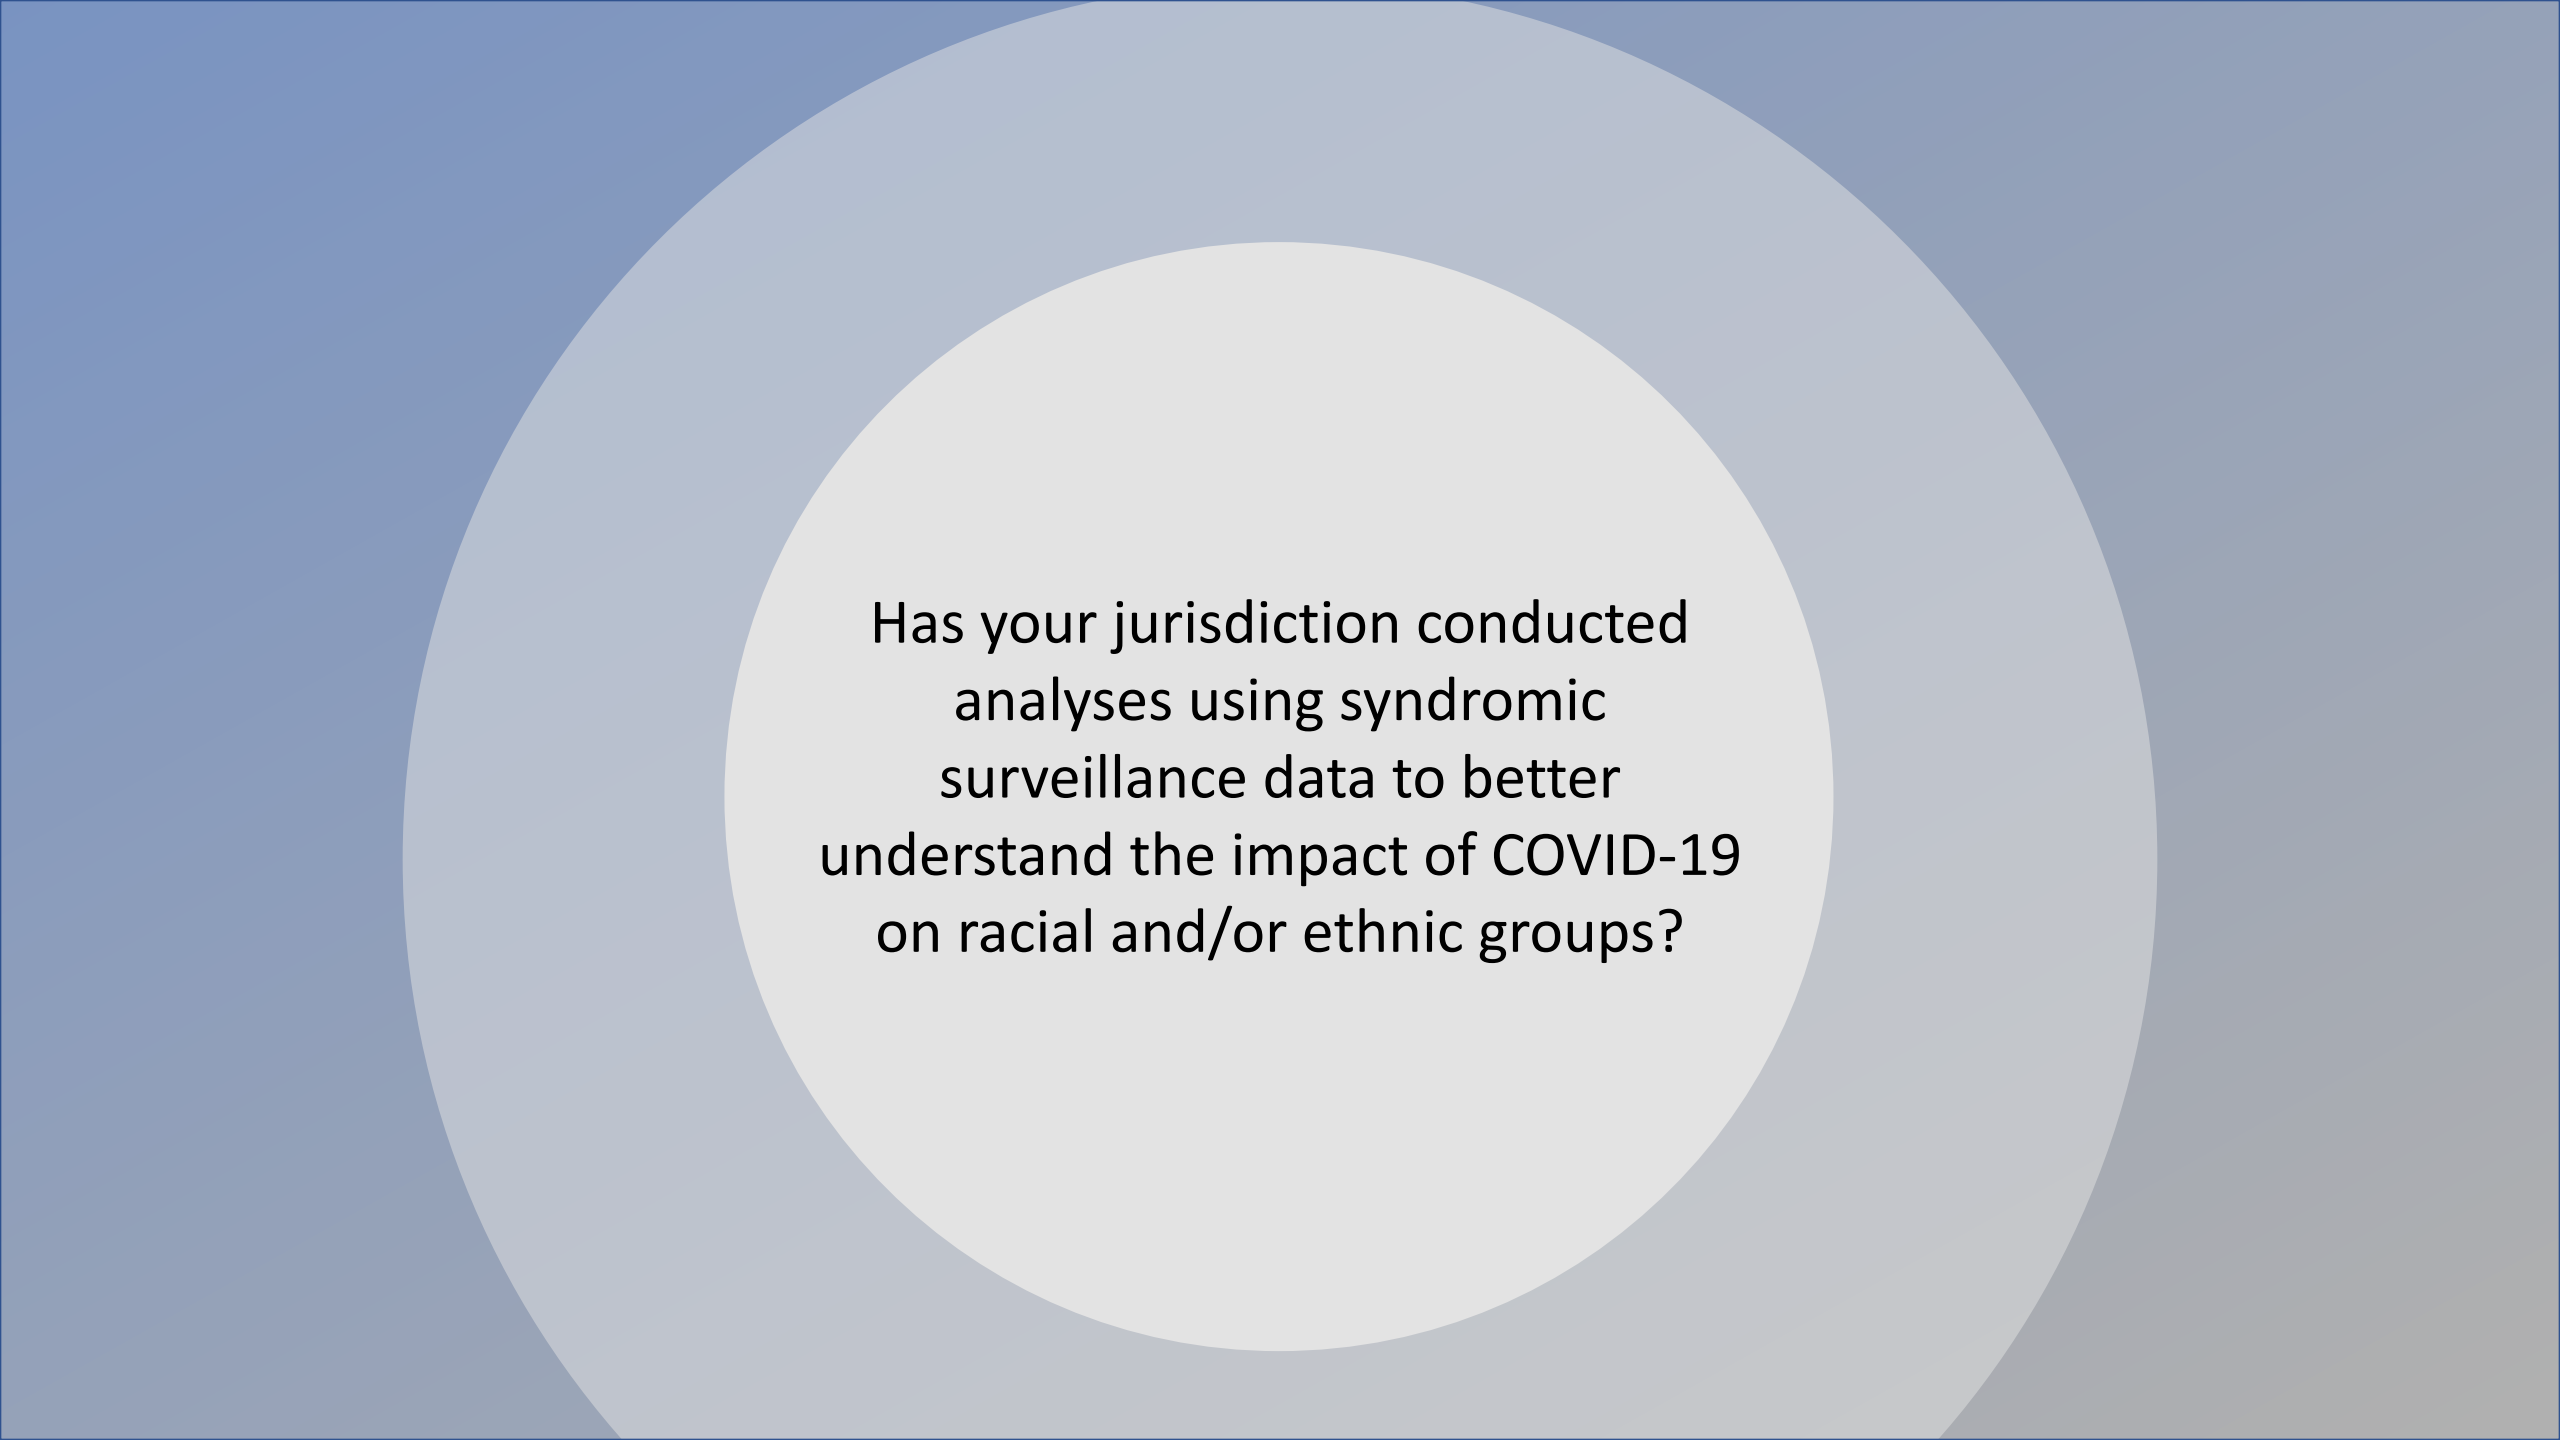

1. Consider alternative sources of data and expertise to evaluate societal issues and their impact on overall public health, and the COVID-19 pandemic.
2. Identify approaches being taken by various jurisdictions to develop remedies for specific societal issues.
3. Have an improved awareness and understanding of a range of societal factors on public health.

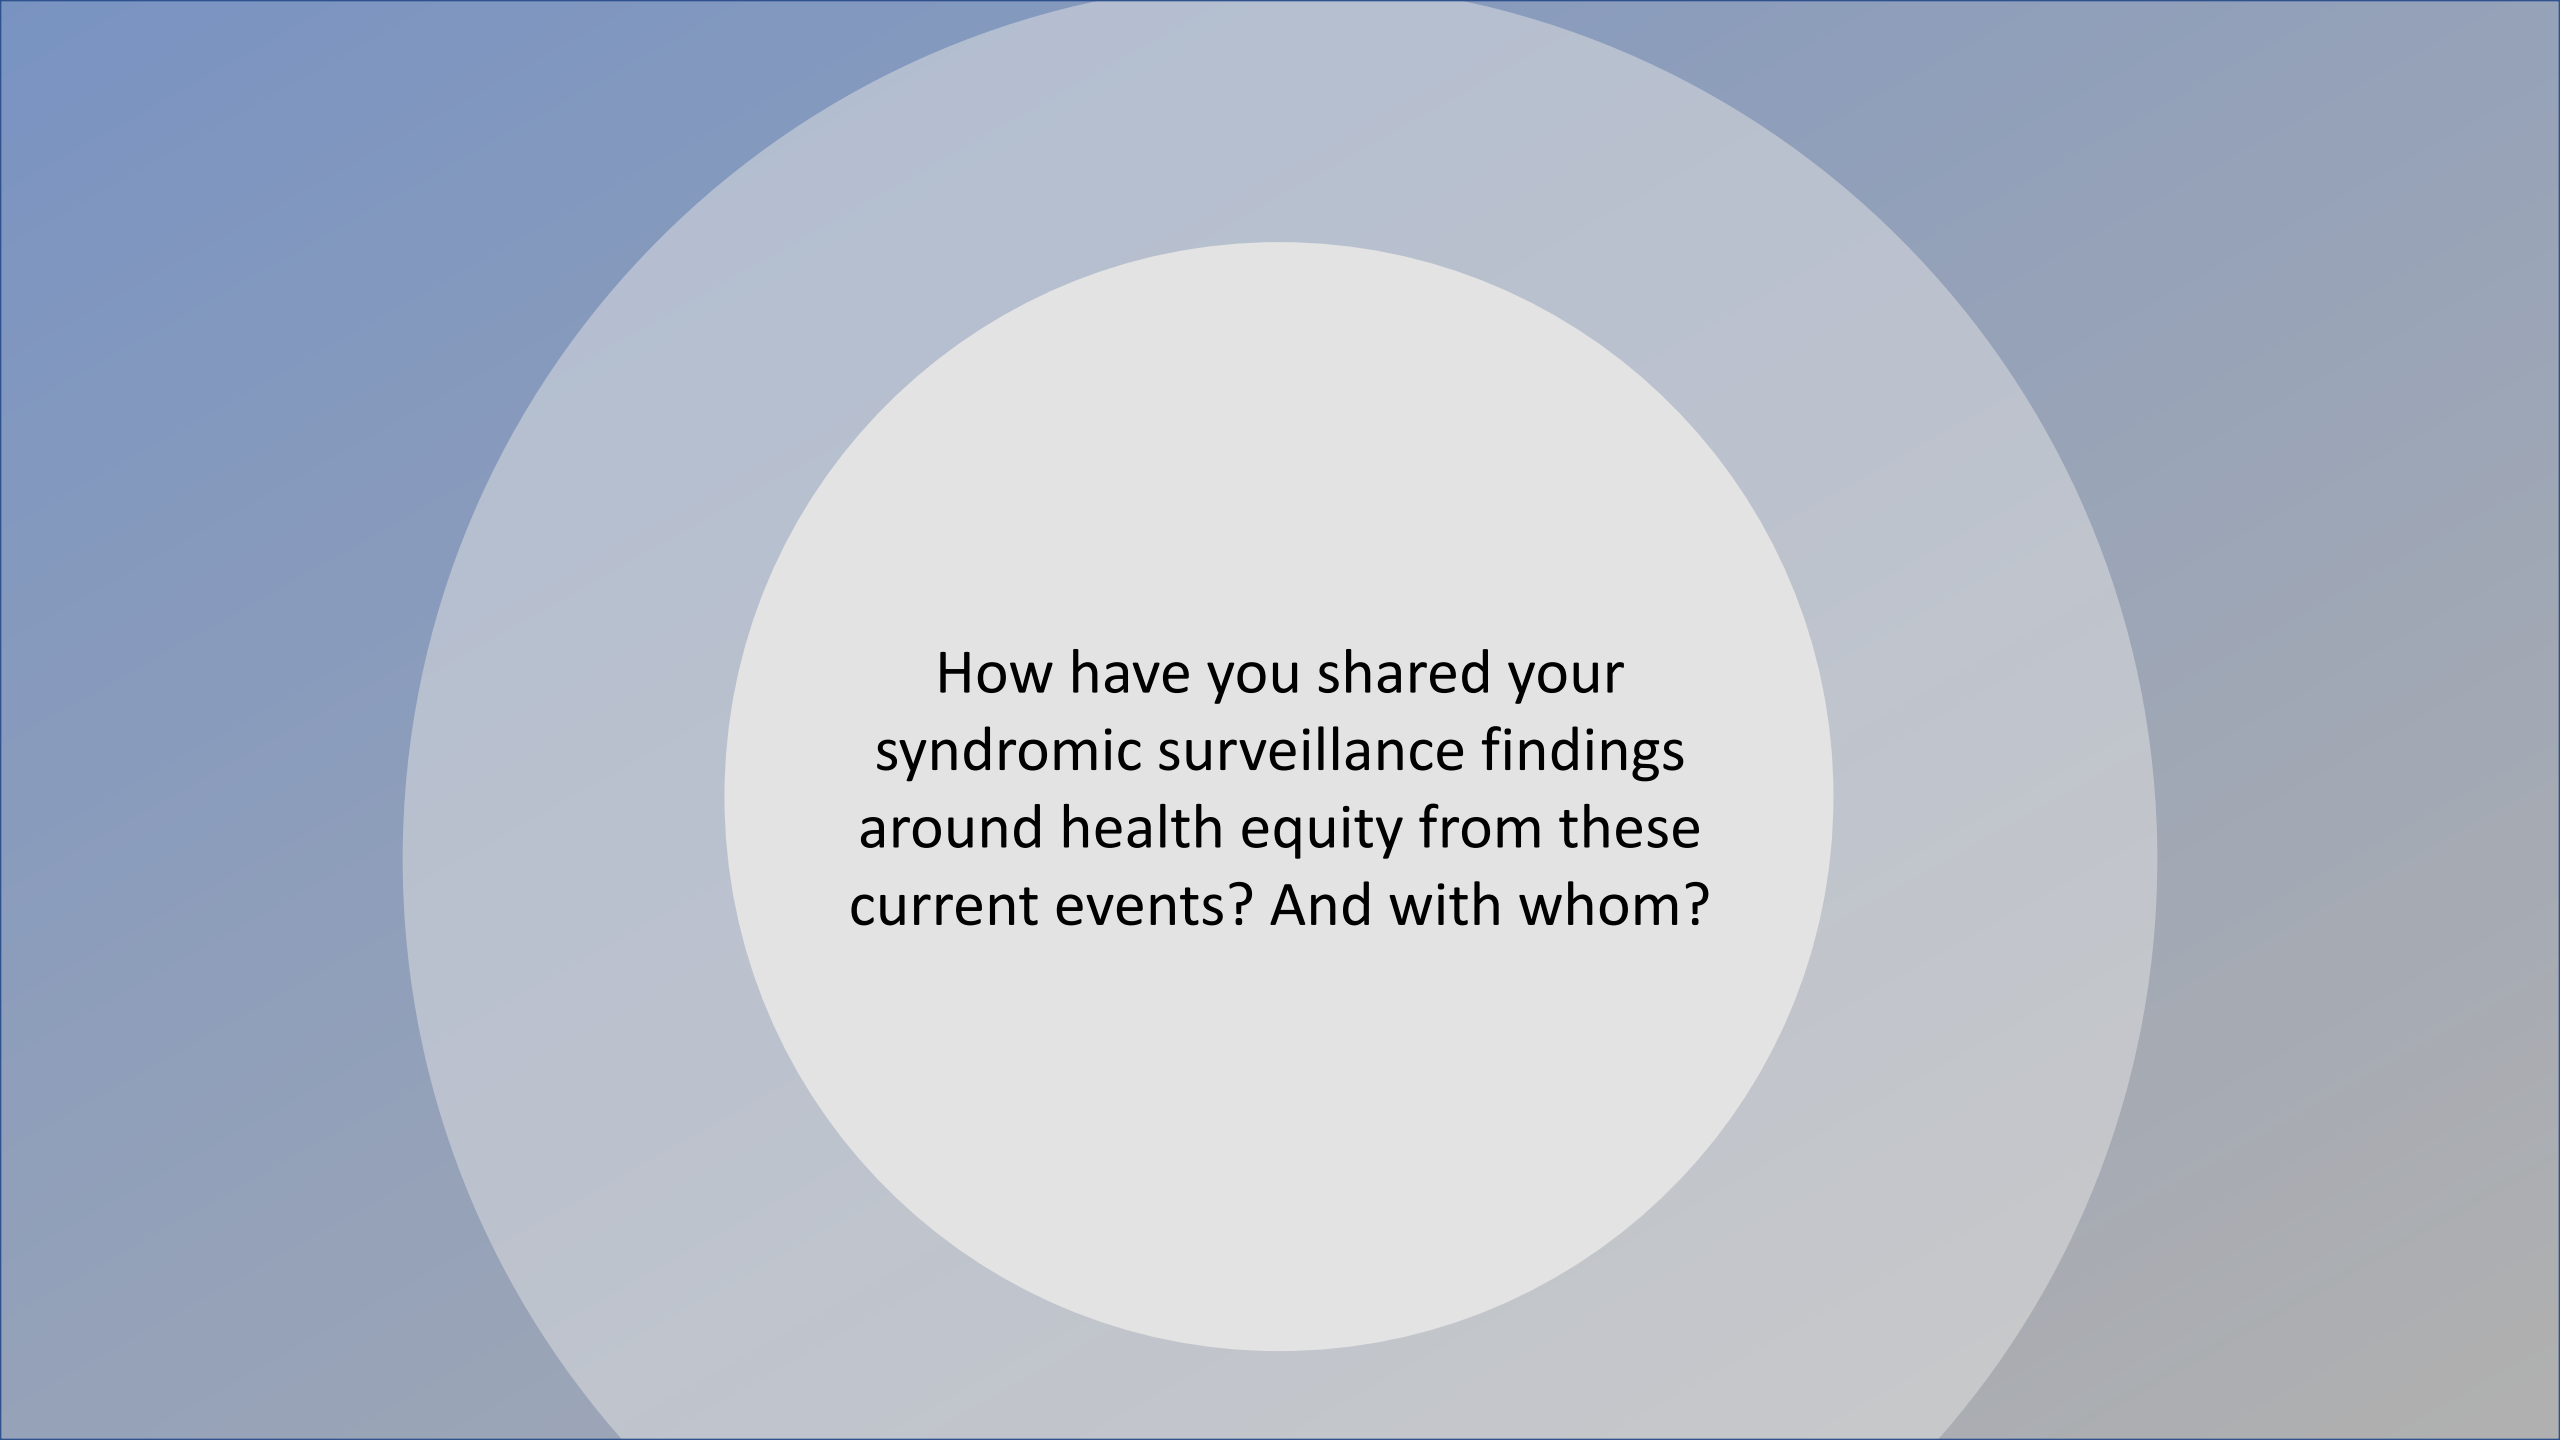

What is your jurisdiction's experience
with conducting syndromic
surveillance or developing definitions
for current events like protests or
police-involved shooting?

During your surveillance of
these events did you notice
any disparities among different
population subgroups?

Has your jurisdiction conducted
analyses using syndromic
surveillance data to better
understand the impact of COVID-19
on racial and/or ethnic groups?

How have you shared your
syndromic surveillance findings
around health equity from these
current events? And with whom?

National Syndromic Surveillance Program
