

CSTE Legionnaires' Disease Surveillance Workgroup

Co-chairs: Vivian Hawkins (WA), Tori Burket (CO)

Workgroup Charge: The purpose of this workgroup is to inform and improve practices related to Legionnaires' disease surveillance and response in local, state, tribal, and territorial settings.

Workgroup Objectives, *in order of prioritization*

- Develop revisions to the current case definition (09-ID-45) to address current challenges and gaps in Legionnaires' disease surveillance
- Identify and document best practices for Legionnaires' disease surveillance, cluster identification, and outbreak response
- Identify and engage national partners

To participate in the workgroup

We invite members who are epidemiologists/informaticians/public health practitioners engaged in infectious disease and environmental health activities related to Legionnaires' disease surveillance at local, state, tribal, and territorial health departments to participate in the workgroup activities.

If you are interested in participating in this workgroup please contact Monica Schroeder (mschroeder@cste.org) and Hayleigh McCall (hmccall@cste.org).

Questions?

For more information or questions, please contact Monica Schroeder (mschroeder@cste.org) and Hayleigh McCall (hmccall@cste.org) at the CSTE National Office.
