More Training Opportunities

CDC's National Environmental Public Health Tracking Program

Tracking Developer Series

The series will feature how to use and share over 600 environmental, public health, and demographic data measures featured on the Tracking Network. The series will also offer a deeper dive into the Tracking Program's application program interface (API) by providing additional background and details along with short, real-world examples in various development languages, including Python, OpenLayers, jQuery, R, D3, and more. Example code from the event will be available on GitHub following the presentations. These sessions will also be recorded.

October 18th & November 1st

2:00–3:30 p.m. ET.
