

Appendix 5. International Classification of Disease, Revision 10, (ICD 10) codes typically used to code carbon monoxide poisoning, toxic effect of carbon monoxide, or carbon monoxide exposure (explicit for or inclusive of CO) when they appear on a death certificate.

Explicit:

T58 Toxic effect of carbon monoxide

Incl.:

From all sources

Inclusive:

X47 Accidental poisoning by and exposure to other gases and vapours

Incl.:

carbon monoxide

helium (nonmedicinal) NEC

lacrimogenic gas [tear gas]

motor (vehicle) exhaust gas

nitrogen oxides

sulfur dioxide

utility gas

Excl.:

metal fumes and vapours (X49)

X67 Intentional self-poisoning by and exposure to other gases and vapours

Incl.:

carbon monoxide

helium (nonmedicinal) NEC

lacrimogenic gas [tear gas]

motor (vehicle) exhaust gas

nitrogen oxides

sulfur dioxide

utility gas

Excl.:

metal fumes and vapours (X69)

Y17 Poisoning by and exposure to other gases and vapours, undetermined intent

Incl.:

carbon monoxide

helium (nonmedicinal) NEC

lacrimogenic gas [tear gas]

motor (vehicle) exhaust gas

nitrogen oxides

sulfur dioxide

utility gas

Excl.:

metal fumes and vapours (Y19)
