Subject: Group 2 CSTE Law Project - 6/10 Call Recap and Next Steps

Thanks for the Group 2 call today. A quick recap and next steps:

- Song provided a quick update on last week's Law Project roundtable discussion about information sharing and legal issues at CSTE's conference. It was a very successful roundtable that saw a capacity crowd of over 60 attendees (vs. the dozen or so anticipated)! Participants stressed the need for guidance about what data public health agencies can collect, what they can disclose and to whom. The group also raised the issue of accessing medical records in conjunction with the opioid epidemic.
- In light of the roundtable's discussion of the opioid epidemic, our group briefly discussed the issue and aspects of the topic that may be relevant to add as a "case study" or some other stand-alone document in the revised toolkit. Pat will conduct some research and outline ideas for the group to consider.
- We completed discussion of the Information Sharing toolkit. If you have any more comments you'd like me to address in the revision process, please send them to me ASAP.
- Finally, we re-introduced the PH and Schools toolkit for discussion. We discussed the potential implications of the current measles outbreak generally and tasked the group to consider if the current toolkit contents cover the issues arising in the outbreak. Group members should also consider if a case study or some other stand-alone document should be added to the toolkit on the measles outbreak.

Please send any **written comments on the PH and Schools toolkit by Friday, June 21st by COB** (wherever you are). The **next Group 2 call will be Monday, June 24th at 2 pm ET.**

Best,
Pat
