

KR Curation Team

Description

Mission

To support ISDS in the development and curation of the Surveillance Knowledge Repository by to ensure that the repository remains current and relevant to the syndromic surveillance community.

Activities Summary

This group is involved in reviewing and curating the Surveillance Knowledge Repository currently under development by ISDS and the NSSP-CoP Steering Committee.

Current Activities

- Evaluation and review of the existing KR resource to determine their continued relevance to the current goals and needs of the community
- Support of the development of new content to be included in the Surveillance Knowledge Repository
- **The KR Curation Team is looking for new members to act as Subject Matter Experts to help evaluate new resources! Please join our group if you are interested!**

Past Accomplishments

- Assistance with the upload of over 500 abstracts from past ISDS Conferences including those from 2014-2016
- Addition of over 150 webinars to the Webinar Library
- Testing and development of the Stories of Surveillance in Action repository of success stories collected from the syndromic surveillance community
