

Foodborne and Diarrheal Diseases Message Mapping Guide (FDD MMG)

**Division of Foodborne, Waterborne, and Environmental Diseases
Division of Parasitic Diseases & Malaria, Center for Global Health**

CSTE webinar

October 25, 2017

Webinar purpose is to open a period for informatics/IT feedback

- Identify discrepancies in the message mapping guide specifications
- Identify areas for technical clarification
- Assess feasibility of IT implementation in your state

Agenda

- MMG overview and components
- How to use the FDD MMG to build a message
- Timeline towards MMG implementation (2017–2018)
- Goals and processes for MMG review period

Foodborne and Diarrheal Diseases Message Mapping Guide (FDD MMG) overview

- Guide for **all states** sending data elements via HL7 for multiple nationally notifiable conditions
 - STEC, salmonellosis, shigellosis, campylobacteriosis, cryptosporidiosis, cyclosporiasis, cholera/vibriosis, typhoid/paratyphoid

- Contains subset of data elements sent by **EIP states only** to FoodNet
 - Includes yersiniosis, which is not nationally notifiable
- Designed to be used in conjunction with Generic v2 MMG
- Excel file with condition-specific tabs

Fever
No

...repeat blocks as needed

Refer to case report forms and data dictionaries for relevant values

- Value sets and repeating blocks are designed flexibly to apply across multiple conditions
- Case report forms and data dictionaries specify which values within the set are relevant for each condition

REPEATING GROUP: 56831-1 & INV929	
Signs and symptoms:	
INV929 Diarrhea: <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown If yes, maximum number stools per day: 9253-6 (unknown = 999)	INV929 Fatigue: <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown Anorexia: <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown Nausea: <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown Vomiting: <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown Abdominal cramps: <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown
INV929 Weight loss: <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown If yes, baseline weight: 75292-3 lbs. (unknown = 999) Number of pounds lost: OBX-6	
INV929 Fever (or felt feverish): <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown If yes, temperature: _____ degrees F (unknown or not measured = 999) 81265-1 OBX-6	
INV929 Other symptoms (specify): _____	

Laboratory tabs

- **“Antimicrobial susceptibility”** is an optional set of elements that can be used to transmit antimicrobial susceptibility results
- **“Lab Template”** can be used to transmit primary laboratory data (e.g., ELR). It is optional for non-EIP states.

			OBX segment with
	N/A	N/A	OBX segment with
Antimicrobial Susceptibility		Lab Template	

Cholera and vibriosis

- Repeating group for harvest area traceback data
- Repeating group for seafood investigation data
- Link through Seafood Investigation ID

START: Seafood Investigation Repeating Questions	
Seafood Investigation ID	FDD_Q_934
Type of Seafood Investigated	FDD_Q_1132
Date Seafood Consumed	FDD_Q_1133
Amount of Seafood Consumed	FDD_Q_940

START: Harvest Area Repeating Questions NOTE: This group repeats	
Seafood Investigation ID Link	FDD_Q_1134
Harvest Region	FDD_Q_955
Harvest State	FDD_Q_956
Area Listed on Tag	FDD_Q_957

STEC

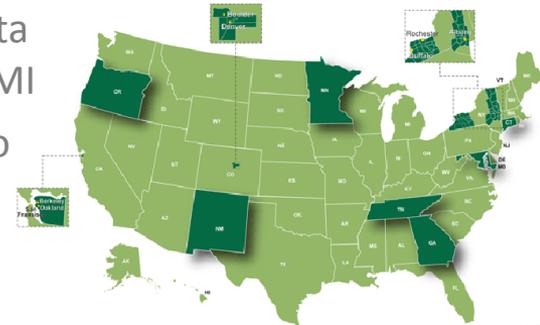

- MMG allows transmission of CSTE-approved data elements (PS 17-ID-10)
- Draft annotated case report form created to aid MMG interpretation
 - Includes CSTE-approved data elements and optional elements based on discussion with state panels
- Note: Shiga toxin 1, 2, and 1&2 added to value set for test results

Paratyphoid fever reporting

- Paratyphoid fever case notifications are usually sent by jurisdictions using the salmonellosis condition code
- Paratyphoid fever data elements are more similar to those of typhoid fever than salmonellosis
- A separate condition code for paratyphoid fever has been created in anticipation of MMG implementation

FoodNet pilot

- Emerging infections program (EIP) in collaboration with the NNDSS Modernization Initiative and APHL is providing technical assistance teams to FoodNet sites to implement Message mapping Guide (MMG)
- **Goal**
 - 3 of 10 EIP FoodNet sites (MN, NY, OR) transmitting data through HL7 by January 2018
 - All FoodNet sites transmitting data through HL7 by January 2019
- **Objectives**
 - Build capacity for simplified and streamlined “state to CDC” data transmission through HL7, the same platform to be used for NMI
 - Assess feasibility, resources required, and identify challenges to national implementation of MMG and HL7

FDD MMG timeline

- 8/1/2017: Began piloting FDD MMG in 3 FoodNet sites (MN, NY, OR)
- 10/25/2017: Webinar to present draft FDD MMG to all states for feedback
- 10/25–11/17/2017: Public review period for draft FDD MMG
- Ongoing: CDC developing listeria tab for next version of FDD MMG
- 11/17/2017: CDC starts review of feedback and creates resolutions with CSTE and external partners
- 6/2018: Final FDD MMG available for all states to implement

External review process

- Please provide feedback by 11/17
- To report your feedback, please use the FDD MMG feedback document provided here: <https://wwwn.cdc.gov/nndss/case-notification/>
- Email feedback to: edx@cdc.gov
- Subject line: “Draft FDD MMG Feedback”

Include

- Data Element (DE) Identifier Sent in HL7 Message or Data Element Name
- Comment/question/suggestion
- Include evidence to support suggestion if possible
- Additional contact information (name and phone number)

Feedback review process

- CDC will aggregate feedback
- Feedback will be reviewed by
 - Surveillance Operations Team
 - Message & Vocabulary Team
 - CDC program staff
- CDC will share the outcome of the reconciliation process with state partners upon request
 - To submit a request for reconciled feedback, please contact edx@cdc.gov, subject line “Request for FDD Reconciled Feedback”
- RESULT: “Pilot Test-Ready” MMG Package

We need your feedback

- Which variables will easily map to the MMG, and which will not?
- Are value sets adequate?
- Can your state map data to laboratory elements within the condition-specific tabs?
- Can your state map data to the laboratory identifiers?
- Which format (lab template, antimicrobial susceptibility template, or lab data elements within condition-specific tabs) is preferred in your state for sending lab data?

For questions regarding the presentation, please contact:
edx@cdc.gov, subject line “Questions: 10/25 FDD Presentation”

For more information, contact CDC
1-800-CDC-INFO (232-4636)
TTY: 1-888-232-6348 www.cdc.gov
