

2017 CSTE ANNUAL Conference

MOBILE APP GUIDE

Download the mobile app for easy access to **everything** happening at the 2017 CSTE Annual Conference.

Looking for convenience? This app is for you: from speaker schedules and abstracts to maps and shuttle schedules, the 2017 CSTE Conference App puts all the details at your fingertips. With real-time updates, you'll suddenly need a new excuse to visit the registration desk. Plus, it's free to download! Here's how to get started in the app.

HOW TO DOWNLOAD:

- 1 iOS, Android, Blackberry:** Search and download "2017 CSTE Annual Conference" from your app store¹, or scan the following QR code:

- 2 Open the App:** Select the "CSTE 2017" icon from your device screen:

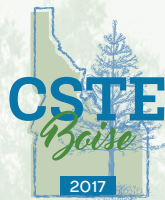

- 3 Explore:** Allow push notifications if prompted

¹Or visit www.core-apps.com/dl/cste17 on your mobile browser

MOBILE APP GUIDE

Page 2 of 4: Navigating the Dashboard

The **Dashboard** is your app's "home page", which you can always get back to – from anywhere in the app – by tapping the  icon in the top left.

Let's go over a few of the most popular items on the dashboard:

My Schedule is the best way to keep track of your own, [personalized](#) path through the 2017 CSTE Annual Conference. We'll go over how to craft your schedule on the following page.

Maps offers a quick glance at the [floorplans](#) of the Boise Centre, Networking Hall, and Grove Hotel, and even a restaurant map organized by walking distance.

Events gives you access to the [full conference schedule](#), browsable by day or by track. From here, you can "star" sessions, which automatically adds them to your My Schedule section ()

Search: Know the name of your session, but can't remember the day? Use the search function in the top Quick Bar to type in one or more [keywords](#), and watch the results appear in real-time!

Other features of note:

- The **Navigation Bar** (   ) gives you information and options for different areas of the app.
- The **Quick Bar** () allows for easy access to common areas, and is visible from anywhere within the app.
- You can adjust app settings, like push notifications or a reset of the in-app prompts, via the gear icon () in the Navigation bar.

Page 3 of 4: Creating Your Schedule

My Schedule (📅) is where you view your personalized schedule. Select an individual day by tapping the corresponding gray rectangle just below the navigation bar. Then, use your finger to scroll within a day to view your events.

You'll notice, however, that your schedule is empty by default. Fill it out by [bookmarking](#) events!

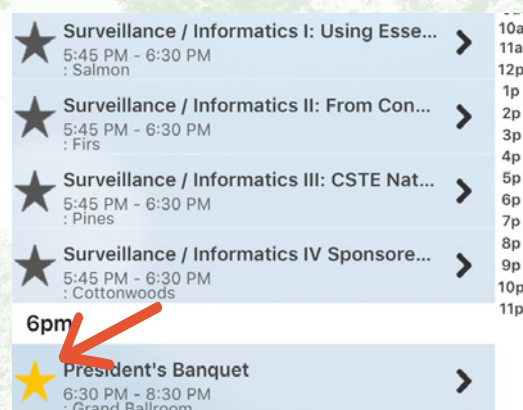

To bookmark an event, you'll need to tap the **Events** icon (📅), either via the **Quick Bar** (🏠 📱 📅 🗣️ 👤 🔍) or the **Dashboard**. The next page will look like the screenshot to the left – an opportunity to browse the master schedule by day or by track. Let's tap on "Browse by Day" as an example.

The following page lists all events for the day, which can be changed via the gray rectangles below the navigation bar. Navigate within a day by scrolling up/down with your finger, or by tapping the vertical mini-nav to your right. Alternatively, you can search by session name/title using the Search Events field:

Once you've found the session, [tap the star icon](#) (★) to its left, and viola! The session is automatically added to **My Schedule**.

Page 4 of 4:
Individual Event Pages

Tap "Show more" to view all speakers or topics, if multiples exist.

Individual event pages offer [extra detail](#) on specific sessions, including location, full topic/speaker listings, outlets for sharing, and more. The page is divided into six sections:

1 Event title

2 Location, date, duration

3 Topics (if available)

tap each topic to view more information, like [abstracts](#)

4 Speakers

tap each speaker to view his/her related sessions or abstracts throughout the conference

5 Tracks (if applicable)

tap to view all other conference events for that track

6 Utility menu

The **Utility menu** performs common actions with Events, such as adding to your schedule or calendar, taking notes, and completing surveys.

- The **share** icon () allows for sharing events in-app between friends at the conference, or via your phone's default sharing options (e.g. text, email).
- The **notes** icon () is a text editor that saves notes you type manually, per event.
- The **survey** icon () allows you to rate individual events only after it occurs.
- The **star** icon () bookmarks the event, saving it to your **My Schedule**.
- The **help** button () expands the utility menu horizontally to see all labels.
