

Table 6. Number of Hospitalizations for Work-Related Burns by State and U.S., 2004

	CA	CT	FL	IA	KY	LA	MA	ME	MI	NJ	NM ¹	NY	OK	OR	TX	WA	WI	US
Work-related burn hospitalizations	184	41	161	31	44	32	69	7	111	58	<10	313	51	24	213	71	59	8251

¹The New Mexico Health Policy Commission prohibits public disclosure of counts less than ten.

Figure 6. Rate of Hospitalizations for Work-Related Burns by State and U.S., 2004

A rate was not provided by New Mexico. See footnote 1 above.

Data Sources: Number of hospitalizations per state: state hospital discharge data. Estimated number of hospitalizations in the U.S.: [National Hospital Discharge Survey](#).
Employment statistics used to calculate rates: [Bureau of Labor Statistics' Current Population Survey](#).

Technical Notes:

- Hospital discharge records are limited to records from non-federal, acute care hospitals.
- This indicator excludes a state's residents who were hospitalized out of state. These exclusions will result in some undercount of cases. The degree of undercounting may vary by state.
- Some workers are hospitalized more than once for injuries related to a given incident. Due to data limitations, these secondary hospitalizations cannot be excluded. Thus, this indicator is a measure of hospitalizations, not burn injuries.
