

Table 15. Number of Workers Employed in Occupations with High Risk of Occupational Morbidity by State and U.S., 2005

	CA	CT	FL	IA	KY	LA	MA	ME	MI	NJ	NM	NY	OK	OR	WA	WI	US
Workers in high risk ¹ occupations	1,660,242	144,532	969,025	190,845	231,149	269,703	292,711	89,825	543,019	389,567	112,575	915,259	186,042	172,937	304,566	368,243	13,704,562

¹ High risk occupations had at least twice the overall national rate of injuries and illnesses resulting in days away from work, as estimated by the Survey of Occupational Injuries and Illnesses, Bureau of Labor Statistics, 2003. See Technical Note below.

TX did not report data for this indicator.

Data Source: Bureau of Labor Statistics' Current Population Survey

Technical Note:

o The composition of occupations that comprise "high risk" for this indicator have changed from the group of occupations that were used to generate 2000-2002 data. This most recent group will be used through 2008.
