

Table 16. Number of Workers Employed in Occupations and Industries with High Risk of Occupational Mortality by State and U.S., 2005

	CA	CT	FL	IA	KY	LA	MA	ME	MI	NJ	NM	NY	OK	OR	WA	WI	US
Workers in high risk occupations ¹	1,693,732	135,023	946,904	211,104	215,604	260,056	259,525	61,821	429,645	372,107	132,750	712,287	214,610	175,340	303,352	305,239	13,542,773
Workers in high risk industries ²	2,345,117	175,285	1,345,836	258,714	279,089	371,437	337,559	122,295	542,609	452,151	173,828	890,633	291,312	269,715	424,109	401,477	19,391,501

¹ High risk occupations had greater than 9.5 injury deaths per 100,000 workers, as reported by the Census of Fatal Occupational Injuries (CFOI), Bureau of Labor Statistics, 2003.

² High risk industries had greater than 9.5 injury deaths per 100,000 workers, as reported by the CFOI, Bureau of Labor Statistics, 2003.

TX did not report data for this indicator.

Data Source: Bureau of Labor Statistics' Current Population Survey

Technical Note:

o The composition of occupations that comprise "high risk" for this indicator have changed from the group of occupations that were used to generate 2000-2002 data. This most recent group will be used through 2008.
