Janet Hamilton, Florida Department of Health

Bryant Karras, Washington State Department of Health

Panelists:

Falling behind: United States is playing the game of health without a scoreboard

Stephen A. Bezruchka, Senior Lecturer, University of Washington School of Public Health

Public health impact of calcium and vitamin D: What are we waiting for?

Robert R. Recker, Director, Osteoporosis Research Center

Adverse childhood events and chronic disease: The elephant in the room

Robert F. Anda, Co-Principal Investigator, Adverse Childhood Experiences Study

STEPHEN BEZRUCHKA, MD, MPH

Stephen Bezruchka is Senior Lecturer in the School of Public Health at the University of Washington, Seattle, where he received the 2002 Outstanding Teacher Award and the 2008 Faculty Community Service Award for his work in population health. He worked clinically as a doctor for 35 years including three decades as an emergency physician. He spent over 11 years in Nepal, writing the first trekking guide to that country, running a community health project a week's walk from the road, training Nepali doctors in a remote district hospital and advancing concepts of population health. His work focuses is on creating greater public understanding of the determinants of health through teaching, talking and writing at various levels.

ROBERT R. RECKER, MD

Dr. Recker, a 1963 graduate of the Creighton University School of Medicine, and Director of the Creighton University Osteoporosis Research Center, is an internationally recognized expert in the field of metabolic bone disease. His 40-plus year career as physician-scientist includes laboratory and clinical research, teaching, patient care, and professional leadership. He holds the ranks of Master, American College of Physicians, and Fellow, American College of Endocrinology. He is past governor of the Nebraska Chapter of the American College of Physicians and past president of the American Society for Bone and Mineral Research. Dr. Recker is an Associate Editor of BONE, and serves on the editorial boards of several medical journals, - including Osteoporosis International, the Journal of Bone

and Mineral Research and the Journal of Clinical Endocrinology and Metabolism - and is a journal referee for all the leading medical and research publications in the field. He is President of the National Osteoporosis Foundation, serves on its Board of Trustees and chairs its Research Grants Subcommittee. Dr. Recker assembled and edited a classic text on transilial bone biopsy - Bone Histomorphometry: Techniques and Interpretation (CRC Press, Boca Raton, Florida, 1983) that, 24 years post-publication, remains an important resource. His list of professional publications includes more than 400 original papers, chapters, and monographs that deal with calcium physiology, metabolic bone disease, bone histomorphometry, prevention and treatment of osteoporosis, adaptation of bone to loading, and, more recently, the genetics of bone mass.

ROBERT F. ANDA, MD, MS

Dr. Robert Anda is a Senior Researcher in Preventive Medicine and Epidemiology at the Centers for Disease Control and Prevention. He is the principal investigator with the Adverse Childhood Experiences (ACE) Study which examines the health and social effects of adverse childhood experiences over the lifespan. He has authored numerous articles on the study and serves as its Co-Principal Investigator.

Dr. Anda graduated from Rush Medical College in 1979 and received his Board Certification in Internal Medicine in 1982. During 1982-1984 he completed a Fellowship in Preventive Medicine at the University of Wisconsin where he also received a Master's Degree (MS) in Epidemiology. He spent 20 years in the U.S. Public Health Service at CDC conducting research in a variety of areas including disease surveillance, behavioral health, mental health and disease, cardiovascular disease investigations, and childhood determinants of health.

He has more than 100 peer-reviewed publications as well as numerous government publications and has authored several book chapters. In addition, he has received numerous awards and recognition for scientific achievements.
