MOVING FORWARD IN THE EVER CHANGING WORLD

Moderators:

Jerry Fagliano, New Jersey Department of Health and Senior Services

Betsy Kagey, Georgia Department of Public Health

Sharon Watkins, Florida Department of Health

Panelists:

One Health in practice: Identifying emerging infectious diseases at the human-domestic animal-wildlife interface

Jonna AK Mazet, Professor of Epidemiology and Disease Ecology and Director of the One Health Institute and Wildlife Health Center at UC Davis School of Veterinary Medicine

Models or muddles? Climate change, uncertainty, and future infectious disease threats

David N. Fisman, Dalla Lana School of Public Health

Digital disease detection: Harnessing social media for public health surveillance

John S. Brownstein, Harvard Medical School

JONNA AH MAZET, DVM, MPVM, PHD

Dr. Mazet is a Professor of Epidemiology and Disease Ecology and Director of the One Health Institute and Wildlife Health Center at UC Davis School of Veterinary Medicine where she focuses on global health issues and disease transmission among wildlife, domestic animals and people. Dr. Mazet founded California's Oiled Wildlife Care Network (OWCN), the premier model wildlife emergency management system worldwide and remains a consulting expert on animal emergency preparedness and response, serving on multiple government and NGO advisory panels.

In 1998, Dr. Mazet was appointed to the faculty of the School of Veterinary Medicine and became co-director of the fledgling Wildlife Health Center (WHC). She took the WHC from an academic idea to a \$21 million per year global research and service unit dedicated to balancing the needs of people and wildlife. Key accomplishments of the center include identification of the source and mechanism of zoonotic pathogen pollution in coastal communities, surveillance for avian influenza in the Pacific Flyway, pioneering approaches to investigating disease transmission at hot human-animal-environment interfaces, and assisting in the conservation of numerous endangered species through the application of novel and creative epidemiological and ecological methods.

Currently, Dr. Mazet is the Principal Investigator and Director on a new global early warning system, named PREDICT, that is being developed with funding of \$75 million over five years by the US Agency for International Development's (USAID) Emerging Pandemic Threats Program. PREDICT is a multi-institutional, transdisciplinary project in 24 developing countries that is establishing a global surveillance system for zoonotic diseases emerging from wildlife using geospatial modeling, genomics, molecular virology and targeted field studies at hot zoonotic disease transmission interfaces. She leads a network of global NGOs and governmental agencies to build capacity within the PREDICT countries to develop surveillance systems and complete the necessary research to halt the next pandemic, like influenza, SARS, Ebola and HIV that have preceded the program. IN the first two years of the program, PREDICT has implemented surveillance in 20 developing countries, trained over 900 professionals in field and laboratory techniques and biosafety, and discovered over 100 novel viruses.

As a professor in the School of Veterinary Medicine, Dr. Mazet provides service to government agencies and the public faced with emerging infectious disease challenges, including U.S. Agency for International Development, U.S. Fish and Wildlife Service, U.S. Department of Agriculture, U.S. Geological Survey, National Oceanic and Atmospheric Administration, California Department of Fish and Game, National Marine Fisheries Service, and the U.S. Marine Mammal Commission. She is active in international One Health research programs, such as tuberculosis in Africa, disease conflict in Yellowstone National Park, and pathogen pollution of coastal waters with an emphasis on ecology of infectious diseases and wildlife diagnostics and disease surveillance. She has made significant contributions to the development of the School of Veterinary Medicine's and the veterinary profession's emphasis on ecosystem health, especially as it relates to public health and has contributed to curricular development in this realm to help to maintain the veterinarian's role in society.

DAVID FISMAN, MD, MPH

Dr. David Fisman is Associate Epidemiology in the Division of Epidemiology, Dalla Lana School of Public Health, and at the Institute for Health, Policy, Management and Evaluation, both at the University of Toronto. He his MD from the University of Western Ontario in 1994 and trained in Internal Medicine and Clinical Infectious Diseases at McGill, Brown, and Harvard Universities. In 2000 he received an MPH from Harvard School of Public Health, where he was also an AHRQ Fellow at the Harvard Centre for Risk Analysis. His research interests are in the intersection of epidemiological methodology and infectious disease surveillance and control, and including problems in disease seasonality and environmental influence on infectious disease occurrence. He collaborates extensively with front-line

epidemiologists and public health professionals at the local, provincial, and federal levels in Canada.

JOHN S. BROWNSTEIN, PHD

John Brownstein is an Assistant Professor of Pediatrics at Harvard Medical School, and has joint appointments in the Children's Hospital Boston Informatics Program at the Harvard-MIT Division of Health Sciences and Technology and the Division of Emergency Medicine. Dr. Brownstein was trained as an epidemiologist at Yale University where he received his PhD. Dr. Brownstein works on novel spatial modeling approaches for accelerating the translation of public health surveillance research into practice. This research has focused on a variety of infectious diseases including malaria, dengue, HIV, West Nile virus, Lyme disease, RSV and influenza. He is also leading the development several novel GIS-based surveillance systems, including HealthMap.org, a global infectious disease

intelligence system. Dr. Brownstein has advised the Institute of Medicine, the US Department of Health and Human Services, and the White House on real-time public health surveillance. He has authored over thirty articles in the area of spatial epidemiology. This work has been reported on widely including pieces in Science, Nature, New York Times, The Wall Street Journal, CNN, National Public Radio and the BBC.

BREAKOUT SESSIONS

CENTURYLINK CENTER OMAHA ♦ 10:30AM - 12PM

CHRONIC DISEASE / MCH / ORAL HEALTH

206 USE OF GIS: ROAD MAPS TO HEALTH

Moderator: Khosrow Heidari, South Carolina Department of Health and Environmental Control

- 10:30 AM – 11:00 AM 1327393**
The chronic disease epidemiologist's guide to geographic information systems (GIS)
 Joshua Tootoo, University of Michigan
- 11:00 AM – 11:30 AM 1332658**
Development of "potential for impact" maps to focus efforts to reduce obesity through environmental changes as part of the Communities Putting Prevention to Work (CPPW) program
 David Busse, Douglas County Health Department
- 11:30 AM – 12:00 PM 1329609**
Stroke mortality and geographic disparities in drive times to Georgia Coverdell Acute Stroke Registry facilities
 Michael Bryan, Georgia Department of Public Health

CROSS CUTTING

208 IMPROVING EPIDEMIOLOGIC DATA RELATED TO TRIBAL AND OTHER RACIAL/ETHNIC DISPARITIES

Moderator: Joseph McLaughlin, Alaska Department of Health and Social Services

- 10:30 AM – 11:00 AM 1333092**
Impact of inclusion of Indian Health Service hospitalizations on surveillance of alcohol-related chronic disease hospitalizations in New Mexico
 Jim Roeber, New Mexico Department of Health
- 11:00 AM – 11:30 AM 1327707**
Racial misclassification and disparities in mortality among American Indians/ Alaska Natives and other races, Washington **
 Jenine Dankovchik, Northwest Portland Area Indian Health Board
- 11:30 AM – 12:00 PM 1332618**
Evaluating progress among hospitals in collecting improved race, ethnicity and tribal data in New Mexico
 Sue Noell Stone, New Mexico Department of Health

*** RWJF Award Finalists*

BREAKOUT SESSIONS

CENTURYLINK CENTER OMAHA ♦ 10:30AM - 12PM

ENVIRONMENTAL HEALTH

216 CLUSTER INVESTIGATIONS

Moderator: Carina Blackmore, Florida Department of Health

10:30 AM - 11:00 AM

1331772

CSTE/CDC Guidelines for Investigating Cancer Clusters

Kanta Sircar, Centers for Disease Control and Prevention

11:00 AM - 11:30 AM

1332868

Florida's updated response to community concerns located near a National Priority Listing (NPL) site: Review of cancer data and communications strategy

Sharon Watkins, Florida Department of Health

11:30 AM - 12:00 PM

1331769

Hockey player hemoptysis in New Hampshire, January 2011

Steffany Cavallo, New Hampshire Department of Health and Human Services

INFECTIOUS DISEASE I

201 WHAT ARE THE LABORATORY RESULTS TELLING US?

Moderator: Alfred DeMaria, Massachusetts Department of Public Health

10:30 AM - 11:00 AM

1319431

An evaluation of pertussis PCR cycle threshold values by case classification, Washington State, 2007-2011

Azadeh Tasslimi, Washington State Department of Health

11:00 AM - 11:30 AM

1326181

Use of automated testing in syphilis diagnosis and its impact on surveillance - Connecticut, 2010

Kelley Bemis, Connecticut Department of Public Health

11:30 AM - 12:00 PM

1330258

Evaluation of false positive hantavirus results in a commercial ELISA

Barbara Knust, Centers for Disease Control and Prevention

BREAKOUT SESSIONS

CENTURYLINK CENTER OMAHA ♦ 10:30AM - 12PM

INFECTIOUS DISEASE II

202 HEALTHCARE ASSOCIATED INFECTIONS SURVEILLANCE METHODS: USING THE DATA

Moderator: Marion Kainer, Tennessee Department of Health

Moderator: Paul Malpiedi, Centers for Disease Control and Prevention

- 10:30 AM – 10:53 AM **1331722**
Post-discharge surveillance for surgical site infections in New Hampshire hospitals
Katrina Hansen, New Hampshire Department of Health and Human Services
- 10:53 AM – 11:15 AM **1322204**
Using National Healthcare Safety Network (NHSN) data to guide Tennessee's Multidisciplinary Advisory Group
Brynn Berger, Tennessee Department of Health
- 11:15 AM – 11:38 AM **1329564**
Mandatory surgical site reporting in New Hampshire critical access hospitals
Elizabeth Daly, New Hampshire Department of Health and Human Services
- 11:38 AM – 12:00 PM **1329826**
A *Clostridium difficile* infection prevention project involving collaborative groups of long term care facilities: Initial challenges and lessons learned
Nicole Bryan, New York State Department of Health

INJURY

209 INJURIES RESULTING FROM EXTREME WEATHER: A NEW RISK FACTOR?

Moderator: Michael Heumann, Consultant

- 10:30 AM – 11:00 AM **1330271**
Increased risk of fall-related injury in Philadelphia due to adverse weather events
Kathryn Gevitz, Philadelphia Department of Public Health
- 11:00 AM – 11:30 AM **1330777**
Injuries following historic tornados — Alabama, April 2011
Thomas Niederkrotenthaler, Centers for Disease Control and Prevention

LATE-BREAKERS

205

BREAKOUT SESSIONS

CENTURYLINK CENTER OMAHA ♦ 10:30AM - 12PM

OCCUPATIONAL HEALTH I

213 EMERGING ISSUES IN OCCUPATIONAL HEALTH

Moderator: Kathy Leinenkugel, Iowa Department of Public Health

- 10:30 AM - 11:00 AM **1327250**
Assessment of flight attendants' exposure to Polybrominated Diphenyl Ether (PBDE) flame retardants
Stella Beckman, California Department of Public Health
- 11:00 AM - 11:30 AM **1329957**
Characteristics of health-care workers who did not receive annual influenza vaccination, Georgia, 2010
Antionette Lavender, Georgia Department of Public Health
- 11:30 AM - 12:00 PM **1326889**
Healthcare personnel influenza vaccination coverage and policies in South Carolina acute care facilities, 2011-2012
Katherine Habicht, South Carolina Department of Health and Environmental Control

OCCUPATIONAL HEALTH II

214 TOPICS IN WORK-RELATED LUNG DISEASE

Moderator: Margaret Filios, Centers for Disease Control and Prevention

- 10:30 AM - 11:00 AM **1315470**
State-specific proportions of asthma related to work: An update from the Behavioral Risk Factor Surveillance System, 2006-2009
Gretchen Knoeller, Centers for Disease Control and Prevention
- 11:00 AM - 11:30 AM **1324189**
Work-related asthma in the retail trade industry — California, Massachusetts, Michigan, and New Jersey, 1993-2006
Christen Seaman, CDC/National Institute for Occupational Safety and Health
- 11:30 AM - 12:30 PM **1333123**
A regional excess of mesothelioma attributable to two occupational cohorts in Minnesota
Allan Williams, Minnesota Department of Health

BREAKOUT SESSIONS

CENTURYLINK CENTER OMAHA ♦ 10:30AM - 12PM

SURVEILLANCE / INFORMATICS I

203 USING SURVEILLANCE DATA TO IMPROVE CLINICAL CARE

Moderator: Bryant Karras, Washington State Department of Health

- 10:30 AM – 11:00 AM 1318335**
Collecting detailed cancer registry data to perform outcomes-based comparative effectiveness research—Florida, 2011
 Youjie Huang, Florida Department of Health
- 11:00 AM – 11:30 AM 1330679**
Developing a nationwide surveillance system for international adoptees
 Kailey Nelson, CDC Minneapolis Quarantine Station / Minnesota Department of Health
- 11:30 AM – 12:00 PM 1331528**
A predictive influenza model using demographic, clinical and public health surveillance data
 Steve Di Lonardo, New York City Department of Health and Mental Hygiene

SURVEILLANCE / INFORMATICS II

204 VARIATION IN STATE REPORTING REQUIREMENTS: HOW BAD IS THE DISEASE AND WHAT ARE THE OPTIONS FOR PREVENTION AND TREATMENT?

Moderator: Rita Altamore, Washington State Department of Health

- 10:30 AM – 12:00 PM 1366722**
Variation in state reporting requirements: How bad is the disease and what are the options for prevention and treatment?
 Rita Altamore, Washington State Department of Health

SPECIAL SESSIONS

12PM - 2PM

CENTURYLINK  CENTER OMAHA

ENVIRONMENTAL HEALTH

207

NATIONAL TOXIC SUBSTANCE INCIDENTS PROGRAM AWARDEES ANNUAL MEETING

12:00 PM - 2:00 PM

The Agency for Toxic Substances and Disease Registry funds state health departments through the National Toxic Substances Incidents Program (NTSIP) to conduct surveillance on acute chemical incidents and their associated public health impacts. States use this data for prevention, preparedness, and response.

There are currently 7 funded and 2 unfunded states that participate in NTSIP. This is a yearly meeting of states to present program information and share results.

Meeting continues from 4:00 PM - 5:30 PM

ENVIRONMENTAL HEALTH

205

CLIMATE CHANGE SUBCOMMITTEE - DISASTER EPIDEMIOLOGY

12:30 PM - 2:00 PM

Many local and state health departments are investigating the potential public health impacts of climate change. There is significant overlap between areas of concern under projected climate change scenarios and disaster preparedness (for example, heat waves, wildfires, flooding, and other extreme weather events). Issues of interest to both climate change and disaster preparedness epidemiologists include indicator development and use, morbidity and mortality in extreme weather events, surveillance and reporting in disasters, experiences with integrating reporting with the national weather service (NC example), and rapid needs assessment using CASPER.

Meeting continues from 4:00 PM - 5:30 PM

ROUNDTABLE SESSIONS

HILTON OMAHA ♦ 1PM - 1:45PM

CHRONIC DISEASE / MCH / ORAL HEALTH

ROME

1318615

National mentorship program in applied chronic disease epidemiology

Khosrow Heidari, South Carolina Department of Health and Environmental Control

216 POSITION STATEMENT DISCUSSION

Moderator: Alfred DeMaria, Massachusetts Department of Public Health

SPECIAL SESSIONS

4PM - 5:30PM

CENTURYLINK CENTER OMAHA

ENVIRONMENTAL HEALTH

207 NATIONAL TOXIC SUBSTANCE INCIDENTS PROGRAM AWARDEES ANNUAL MEETING

4:00 PM - 5:30 PM

The Agency for Toxic Substances and Disease Registry funds state health departments through the National Toxic Substances Incidents Program (NTSIP) to conduct surveillance on acute chemical incidents and their associated public health impacts. States use this data for prevention, preparedness, and response.

There are currently 7 funded and 2 unfunded states that participate in NTSIP. This is a yearly meeting of states to present program information and share results.

ENVIRONMENTAL HEALTH

205 CLIMATE CHANGE SUBCOMMITTEE - DISASTER EPIDEMIOLOGY

4:00 PM - 5:30 PM

Many local and state health departments are investigating the potential public health impacts of climate change. There is significant overlap between areas of concern under projected climate change scenarios and disaster preparedness (for example, heat waves, wildfires, flooding, and other extreme weather events). Issues of interest to both climate change and disaster preparedness epidemiologists include indicator development and use, morbidity and mortality in extreme weather events, surveillance and reporting in disasters, experiences with integrating reporting with the national weather service (NC example), and rapid needs assessment using CASPER.
