Figure 4. Rate of Work-Related Amputations involving Days away from Work Reported by Private Sector Employers by State and U.S., 2000

The rates published by BLS are the number of amputation cases per 10,000 FTEs. The rates presented here, which are amputation cases per 100,000 FTEs, were derived by multiplying BLS published rates by 10.

These converted rates are not as precise as those that would be calculated from the raw Annual Survey data.
